PROFESSIONAL SUMMARY

Graduated with a Diploma III in Telecommunications Engineering from State Polytechnic of Malang in 2025 (GPA 3.76/4.00) with experience as a Technical Support at Universitas Brawijaya Hospital. Possesses competencies in IT Support, Network Administration, Database Management, and System Administration. Skilled in hardware and software troubleshooting, network configuration (VLAN, Switching, TCP/IP, DHCP, DNS), SQL Database Migration, Linux Server Administration, Backup Automation, and IT infrastructure maintenance. Experienced in supporting hospital operations through IT device management, server backup, technical documentation, and End User Support. Proficient in MySQL, Navicat, Linux, PuTTY, SSH, GitHub, Arduino, and ESP32, with strong problem-solving and communication skills in both team-based and independent work environments.

EDUCATION

Diploma III in Telecommunications Engineering | State Polytechnic of Malang August 2022 – August 2025
3.76/4.00

- Achievement: KT&G (Korea Tomorrow & Global) Scholarship Awardee and Top 3 Academic Performer in the Telecommunications Engineering Program.

WORK EXPERIENCE

MagangHub Kemnaker - Universitas Brawijaya Hospital November 2025 – May 2026
(Technical Support)

- Provided troubleshooting and maintenance for IT equipment (PCs, laptops, and network devices) with a success rate of approximately 95%, reducing downtime by up to 40%.
- Configured and managed network switches (VLAN, access ports, trunk ports, and link aggregation) to maintain network segmentation and stability by up to 80%.
- Performed printer repairs and resolved LAN/switch-related issues, supporting operational efficiency by up to 90%.
- Designed the UI/UX of the Halo RSUB application for digital patient registration, reducing manual queues by 60% and improving registration efficiency by 50%.
- Participated in the hospital accreditation committee for facilities and infrastructure by ensuring stable IT infrastructure, supporting accreditation activities with zero network-related disruptions.

Abdulrachman Saleh Air Force Base Communication Center - Internship July 2024 - November 2024
(Telecommunications Technician)

- Developed an AS608 fingerprint attendance system using Arduino Uno with an accuracy rate of 98%, reducing manual attendance errors by up to 80%.
- Performed maintenance of mobile communication and radio communication equipment, improving reliability by up to 30% and extending equipment lifespan by 20%.

SKILLS

Hard Skill: - IT Support & Troubleshooting - Network Administration (VLAN, Switching, LAN) - System & Server Administration (Linux, SSH, Cronjob, Samba) - Database Management (SQL, MySQL, Migration, Backup) - IoT & Microcontroller Development (Arduino, ESP32, ESP8266, Raspberry Pi) - Programming (Python, C++, JavaScript, Kotlin) - UI/UX Design & Prototyping - Git & GitHub - Microsoft Office (Excel, VBA, Pivot Table, VLOOKUP)	Soft Skill: - Problem Solving: Analyzing technical issues and determining effective solutions within a short timeframe. - Communication Skills: Explaining technical solutions to non-technical users in a clear and understandable manner. - Team Collaboration: Working effectively across departments to ensure smooth IT operations and project execution. - Time Management: Prioritizing tasks and handling multiple technical issues simultaneously. - Attention to Detail: Maintaining accuracy in network configurations and system inspections to minimize operational errors.
